## EXPERIENCE

### **Studio by Engrain | Front-End Web Developer**

January 2017 - January 2020

Collaborated with the design team to optimize features and user experience while maintaining design intent.

Built WordPress sites from the ground up with fully customized themes. Enhanced and maintained over 100 multi-family websites by implementing interactive features and design improvements. Integrated real-time unit availability data for live pricing and online leasing.

Provisioned environments and carried out site transfers to modern servers for ideal speed and security.

### **Engrain | Production Artist**

January 2016 - January 2017

Created, prepared, and programmed technical vector drawings/files to implement into custom software and websites. Assessed and resolved issues with these products while collaborating with the design, development, and account teams.

### **Freelance | Web Developer & Designer**

December 2014 - March 2016

Designed and developed scalable brand identities, materials, and websites for startup companies and small businesses.

### **City of Boulder, CO | Sustainability Intern**

June 2014 - December 2014

Created print and digital collateral for zero waste, energy efficiency, and renewable energy programs that were part of the Climate + Sustainability Division.

Managed content for web and social accounts.
